

# CSV INSTRUCTION

STILEO

THE MOST SIMPLE WAY TO PREPARE CSV-FILE IN OPEN OFFICE CALC (FREE PROGRAM TO DOWNLOAD <https://www.openoffice.org/es/>):

## 1. ENTER THE APPROPRIATE DATA INTO THE COLUMN

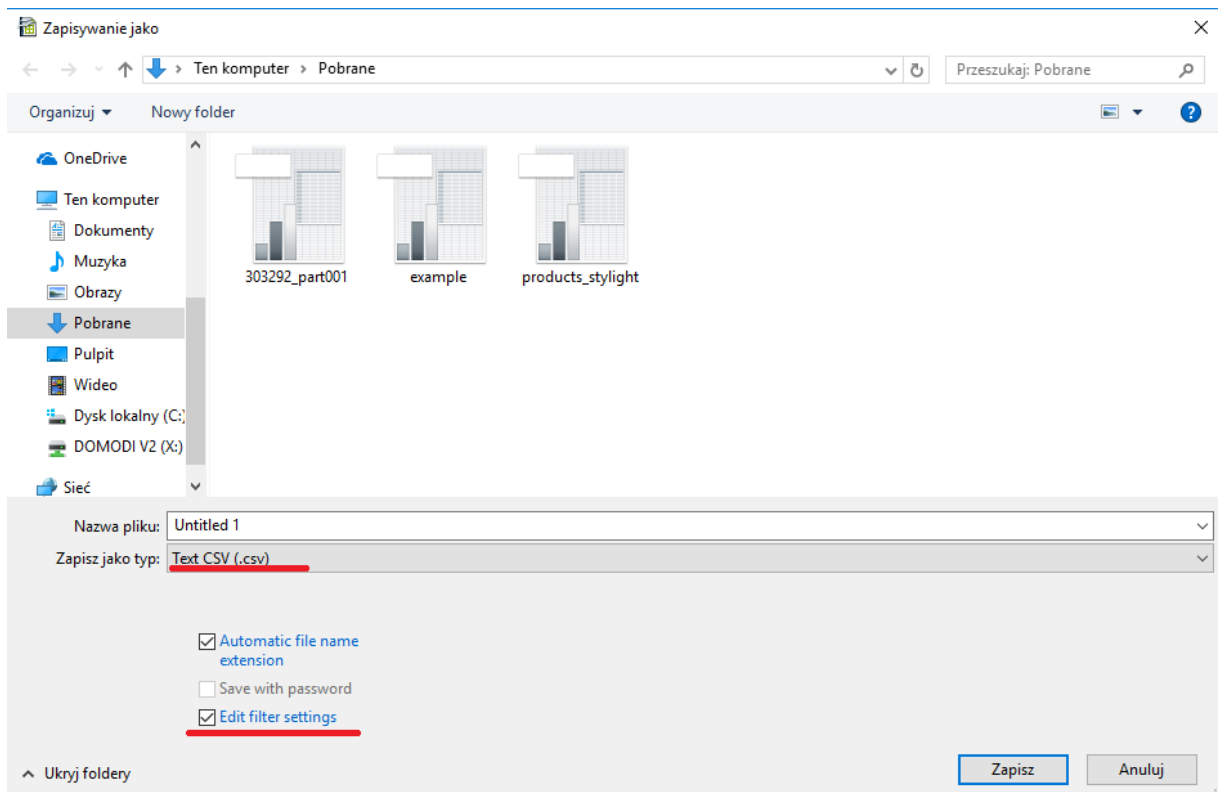

- [1] **URL** - field containing the address of the page leading to the specific product
- [2] **ID** - unique product identifier (if one product is in a file written in several lines because each item size is a separate product - then the ID of this product group may be the same)
- [3] **PRICE** - price of the product
- [4] **OLDPRICE** - additional price (higher than the price) - filling this field will allow showing products in the sale
- [5] **BRAND** - product brand (wrangler, adidas, ...). in this case (screen) it is a monobrand store with its own brands products
- [6] **DESC** - product description
- [7] **AVAIL** - product availability - in this case 1 means that the product is available and 0 that is unavailable - the field must be updated so only available products are presented
- [8] **CAT** - product category. Starts with gender (you can also add a separate column for the gender) for which the product is intended and starting from the main product category goes to a more detailed
- [9] **NAME** - product name
- [10] **IMAGE**, **ADDITIONAL IMAGE**, **ADDITIONAL IMAGE2** - product pictures, there is one picture in each of these fields. The product must have at least one photo.
- [11] **ATTRS COLOR** - available product colors, separated by a character other than a separator in the file
- [12] **SIZE** - available product sizes, separated by a character other than a separator in the file

required fields: 1, 2, 3, 5, 8, 9, 10, 12

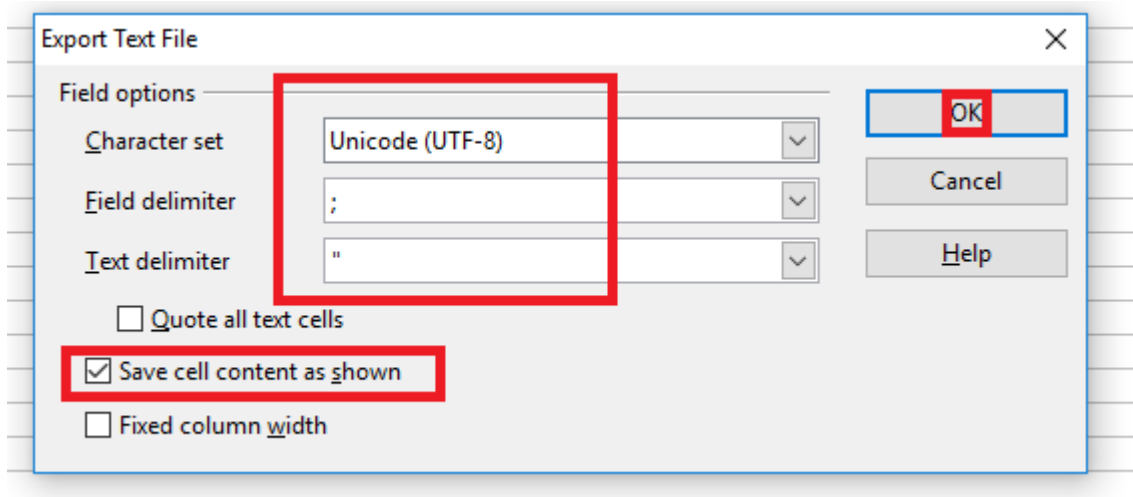

optional fields (but it is also worth completing them): 4, 6, 7, 11
